

URGENT APPEAL

3 minutes can save a life!

HELP SAVE MURRAY'S LIFE

Murray Foltyn, a loving husband and father of two young children, is battling Myelofibrosis, a rare blood cancer. His doctors are URGENTLY seeking a matching blood stem cell donor as a transplant is his best hope of a cure. However, he does not currently have a match in his family or the worldwide marrow registry.

Because tissue type factors needed for a match are inherited, Murray's best chance of finding his donor is among those of Ashkenazi Jewish ancestry, and specifically with a genetic heritage from Slovakia, Czech Republic, Russia and the United Kingdom.

You could be Murray's lifesaving hero without even knowing it! All it takes is a swab of your cheek to find out if you are a match for him or another patient in need.

Joining the registry is as easy as a simple swab of your cheek. Eligible donors must be between the ages of 18-35 and in general good health, meet the guidelines and be willing to donate to any patient, at any time, worldwide.
