ערב סוכות תשפ"ב
September 20, 2021

To the Beloved Members of our Community:

Our community is unfortunately seeing an uptick in positive cases over the last few weeks. The community's COVID testing system has confirmed over 75 positive cases since Rosh Hashana.

With the Yom Tov of Sukkos upon us, we will all be spending more time with people from outside our usual circles, thus warranting some additional concern for continued well-being of our community. Please take heed to the following items:

- Anyone not feeling well or exhibiting even slight COVID-like symptoms is asked to remain at home until clarifying their COVID status.
- Obviously, anyone who has tested positive should not be going out and interacting with others.
- Those who have yet to be vaccinated, please do not further delay getting vaccinated. The vaccines have been proven to be incredibly effective at preventing serious illness and/or death from COVID.

As a community built on achdus and caring for one another, we all need to do what is proper to keep ourselves and those around us from getting sick. In this z'chus may **הקב"ה** have mercy on our community and all of Klal Yisroel and to finally end this terrible pandemic.

Wishing the entire community a beautiful and healthy Yom Tov,

Yaakov Hopfer
